### Wedding Coverage ~ \$1200

What goes into a wedding day? There are so many elements that often get overlooked and never captured at a typical wedding. D. Michael Ramirez specializes in documenting the day as it unfolds and creates images that will last for generations. Today's photojournalistic wedding photography is all about the moments, people and details as they happen. You can look back at your day and relive those moments forever as it happened through your images.

Wedding coverage includes The Preparation which is often full of jitters and details of the bride and groom, flowers and church. The Ceremony captures everything from the groom seeing his bride for the first time to the first kiss as husband and wife. By breaking the standard mold of Formals, we can create images of the bride and groom together on your special day. The Reception is where everyone breaks loose and has a good time. From the cake cutting to the dance floor you can know that the moments will be captured.

After the champagne is gone and you're on your honeymoon the real work begins! Your wedding coverage also includes all the image preparation and digital proofs. You will receive a login to [www.dmrphotography.com](http://www.dmrphotography.com) so you and your entire family can easily view all your images online from anywhere in the world.

We will travel outside the Columbus area! There is a \$150 travel charge outside of the Columbus area inside Ohio. Please ask about our rates outside of Ohio.
